# Copper components supporting the Iron and Steel Industry worldwide

Lebronze alloys (through its German production site Hundt & Weber) is a leading specialist in the production of Water Cooled Cooling Components for use in the field of Iron and Steel making. Our products are successfully used worldwide in the Blast Furnace and Steelmaking Industry.

In an industry that is challenged with an environment which exhibits extreme thermal and mechanical stresses upon the products used in the production process, Hundt & Weber sets new standards in terms of reliability and service lifetime.

Supported by modern technology and a full understanding of the theoretical requirements software calculates the requirements from the customer which is then fully utilized to optimize a solution for the customer. Extensive quality control steps (e.g. X-ray testing, PT, UT) guarantee a permanent and constant high quality level.

## APPLICATIONS:

1. Blast Furnace Industry (BF)
2. Basic Oxygen Furnace Industry (BOF)
3. Electric Arc Furnace Industry (EAF)
4. Submerged Arc Furnaces (SAF) and Smelters

## PRODUCTS:

- ✓ Tuyeres
- ✓ Jumbo coolers
- ✓ Cooling plates
- ✓ Cu-Staves
- ✓ Lance tips/Lance systems
- ✓ Burner Boxes resp. Cooling Boxes
- ✓ Contact Clamps
- ✓ Electrode Holders
